This 18,000 sf 3-story office building in East Sacramento has been renovated for use by Cambridge Homes, a local production housing builder. The project includes a ground floor Design Center showcasing home buyer's choices for finishes, cabinetry and upgrades. The 2nd and 3rd floors accommodate administrative offices, conference, and accounting areas. The renovation re-energizes the previously vacant building and creates a dramatically improved neighbor for the adjacent residences and businesses. →
