The 50,000 sf two-story administrative/office building is the first major new construction project on the Delta College Campus since the original campus development over 30 years ago.

The building provides offices for several newly co-located campus functions serving the students including; admissions (with interview and testing rooms), financial aid offices, guidance and counseling offices, expandable meeting rooms and support areas.

Teamed with Flincto Constructive Solutions, the project successfully utilized a design-build delivery method.
